Advisory:
Google Chrome MetaCharacter URI Obfuscation Vulnerability.

Version Affected:
Chrome/0.2.149.30
Chrome/0.2.149.29
Chrome/0.2.149.27

Release Date:
Disclosed: 24 November 2008
Release Date. 24 November ,2008

Description:
Google chrome is vulnerable to URI Obfuscation vulnerability. An attacker can easily perform malicious redirection by manipulating the browser functionality. The link can not be traversed properly in status address bar.This could facilitate the impersonation of legitimate web sites in order to steal sensitive information from unsuspecting users. The URI specified with @ character with or without NULL character causes the vulnerability.
